1981 Journal of Energy Index

Note: A Cumulative Index, referencing all of the papers published during 1980 and 1981 in the AIAA journals and the *Progress in Astronautics and Aeronautics* books, will be offered for sale early in 1982.

How to Use the Index

In the Subject Index, pages 409-411, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 412, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 413-415, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1981, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Tandem-Disk Theory—With Particular Reference to Vertical Axis Wind Turbines **E81-053**

Aerodynamic Performance of Vertical and Horizontal Axis Wind Turbines **E81-038**

Propeller and Rotor Systems

Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators **E81-021**

Energy

Alternate Fuels

Sensitivity Analysis of a Solar-Driven Chemical Heat Pump System **E81-045**

Combined Fracture/Porous Media Model for Contaminant Transport **E81-074**

Retorting and Combustion Processes in Surface Oil-Shale Retorts **E81-071**

Thermal Performance of a Solar Still **E81-068**

Influence of Contaminated Fuel on Turbine Vane Surface Deposition **E81-063**

Gas Distribution Equipment in Hydrogen Service—Phase II **E81-062**

Peat Char Gasification—Laboratory and PDU-Scale Studies **E81-058**

Eastern In Situ Coal Gasification Field Trial **E81-050**

Projected Costs for Electricity and Products from OTEC Facilities and Plantships **E81-048**

Batteries

Temperature Limitations of Alkaline Battery Electrodes **E81-073**

Low Maintenance Lead-Acid Batteries for Energy Storage **E81-028**

Combustion

Catalytic Combustion of Hydrogen in Model Appliances **E81-060**

Behavior of OH and NO_x in a Mixing-Influenced Jet-Stirred Reactor **E81-042**

Experimental and Theoretical Studies of Nitrogen Oxide Production in a Turblent Premixed Flame **E81-031**

Conservation

Optimization of Liquid Desiccant Systems for Solar/Geothermal Dehumidification and Cooling **E81-078**

Thermal Performance of a Solar Still **E81-068**

Solar Drying of Coal Wastes from Slurry Ponds **E81-051**

Thermodynamic Analysis of a Metal-Hydride Heat Pipe **E81-049**

Rankine Cycle Augmented Light-Gas-Flow Turbine Studies **E81-029**

Experimental Studies of Solar and Solar-Dehumidification Lumber Drying **E81-026**

Exploration and Recovery

Eastern In Situ Coal Gasification Field Trial E81-050

Geothermal

Optimization of Liquid Desiccant Systems for Solar/Geothermal Dehumidification and Cooling E81-078
Predicted Performance of Geopressured Geothermal Energy Conversion Systems Using Thermodynamic Availability Concepts E81-057

Hydrogen and Unique Fuels

Gas Distribution Equipment in Hydrogen Service—Phase II E81-062
Catalytic Combustion of Hydrogen in Model Appliances E81-060
Eastern In Situ Coal Gasification Field Trial E81-050
Thermodynamic Analysis of a Metal-Hydride Heat Pipe E81-049

Magnetohydrodynamics

Heat Transfer Scaling Laws for MHD Channels and Diffusers E81-065
Convective and Radiative Heat Transfer in MHD Radiant Boilers E81-064
Development of Steam Generator Components for Open-Cycle MHD E81-044
Open-Cycle MHD Generator Channel Development E81-035
Wall Leakage Effect on Nonuniformities in Diagonal MHD Channels E81-032
Electron and Positive Ion Measurements in MHD Combustion Plasmas with Phosphorous Additions E81-007
Heat and Mass Transfer in MHD Channels E81-006
Viscous and Thermal Wakes in MHD Generators E81-001

Nuclear Fission

Model for Thermal Distortions of High-Energy Repetitively Pulsed Laser Mirrors E81-070
Transient Heat Conduction From Buried Underground Radioactive Waste E79-001

Ocean Thermal

Test Results for the APL/JHU Folded-Tube Aluminum Condenser E81-077
Projected Costs for Electricity and Products from OTEC Facilities and Plantships E81-048
Design of 40-MW Grazing and Moored OTEC Pilot/Demonstration Plants E81-047
Design of the OTEC Cold Water Pipe Against Problems Due to Vortex Shedding E81-003

Photovoltaic Power

Low Maintenance Lead-Acid Batteries for Energy Storage E81-028
Dependence of Efficiency of Shallow Junction Silicon Solar Cells on Substrate Doping E81-004

Reciprocating Machinery

Experimental Studies of Solar and Solar-Dehumidification Lumber Drying E81-026

Rotating Machinery

Influence of Contaminated Fuel on Turbine Vane Surface Deposition E81-063
Feasibility Studies of Spoiler and Aileron Control Systems for Large Horizontal-Axis Wind Turbines E81-059
Comparison of Field and Wind-Tunnel Darrieus Wind-Turbine Data E81-054
Rankine Cycle Augmented Light-Gas-Flow Turbine Studies E81-029
UTRC 8-kW Wind-Turbine Tests E81-025

Solar Power Satellites

Solar Power Satellites—Heat Engine or Solar Cells? E81-027

Solar Thermal Power

Sensitivity Analysis of a Solar-Driven Chemical Heat Pump System E81-045
Optimization of Liquid Desiccant Systems for Solar/Geothermal Dehumidification and Cooling E81-078
Liquid Droplet Radiators for Heat Rejection in Space E81-076
Thermal Buffering of Receivers for Parabolic Dish Solar Thermal Power Plants E81-075
Pneumatic Energy Transmittal in Wind-Power Systems E81-072
Solar Drying of Coal Wastes from Slurry Ponds E81-051
Use of Organic Working Fluids in Rankine Engines E81-046
Autonomous Solar Thermo Pump for Lift Irrigation E81-039
Seasonal Variations of Atmospheric Clearness Numbers for Use in Solar Radiation Modelling E81-036
Experimental Studies of Solar and Solar-Dehumidification Lumber Drying E81-026
Solar Central Receiver Hybrid—A Cost Effective Future Power Alternative E81-010
Fully Developed Laminar Heat Transfer in Triangular Passages E81-005

Thermionic

Thermionic Emission and Surface Composition of the Y-B System E81-037
Radiatively Coupled Thermionic Power System Concept E81-012

Thermoelectric

Radiatively Coupled Thermionic Power System Concept E81-012

Wind Power

Pneumatic Energy Transmittal in Wind-Power Systems E81-072
Feasibility Studies of Spoiler and Aileron Control Systems for Large Horizontal-Axis Wind Turbines E81-059
Wind Characteristics Over Complex Terrain Relative to WECS Siting E81-056
Teetered, Tip-Controlled 100-kW Wind-Turbine Rotor: Preliminary Test Results E81-055
Comparison of Field and Wind-Tunnel Darrieus Wind-Turbine Data E81-054
Tandem-Disk Theory—With Particular Reference to Vertical Axis Wind Turbines E81-053
Experiments on a Hurricane Windmill Model E81-052
Aerodynamic Performance of Vertical and Horizontal Axis Wind Turbines E81-038
Multispeed Electrical Generator Application to Wind Turbines E81-034
Feasibility Study of Wind-Powered Systems for Dairy Farms E81-033
Wind Shear and Gustiness at the Mod-1 Site, Boone, North Carolina E81-030
Low Maintenance Lead-Acid Batteries for Energy Storage E81-028
UTRC 8-kW Wind-Turbine Tests E81-025
Experiments on an Oscillating Aerofoil and Applications to Wind-Energy Converters E81-024
The Wingmill: An Oscillating-Wing Windmill E81-023
Wind Turbines for Irrigation Pumping E81-022
Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators E81-021
Preliminary Work Concerning the Near-Wake Structure of the Darrieus Turbine E81-020
Wind-Loading Definition for the Structural Design of Wind-Turbine Generators E81-019
Aerodynamic Interference Between Two Darrieus Wind Turbines E81-018
Offshore Wind-Energy-Conversion Systems E81-017
Economics of Selected WECS Dispersed Applications E81-016
Wind-Energy Conversion System Simulation Program E81-015
Aerodynamic Performance of the DOE/Sandia 17-m-Diameter Vertical-Axis Wind Turbine E81-008

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Laminar

Heat and Mass Transfer in MHD Channels E81-006

Boundary Layers and Convective Heat Transfer-Turbulent

Heat Transfer Scaling Laws for MHD Channels and Diffusers E81-065
Convective and Radiative Heat Transfer in MHD Radiant Boilers E81-064
Wall Leakage Effect on Nonuniformities in Diagonal MHD Channels E81-032

Boundary-Layer Stability and Transition

Wind Shear and Gustiness at the Mod-1 Site, Boone, North Carolina E81-030

Computational Methods

Wind Characteristics Over Complex Terrain Relative to WECS Siting E81-056
Preliminary Work Concerning the Near-Wake Structure of the Darrieus Turbine E81-020

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Preliminary Work Concerning the Near-Wake Structure of the Darrieus Turbine E81-020

Multiphase Flows

Test Results for the APL/JHU Folded-Tube Aluminum Condenser E81-077
Calculated Characteristics of a Hydraulic Refrigeration System E81-067
Falling-Bead Dry Cooling Tower E81-066

Nonsteady Aerodynamics

Experiments on an Oscillating Aerofoil and Applications to Wind-Energy Converters E81-024
The Wingmill: An Oscillating-Wing Windmill E81-023

Nozzle and Channel Flow

Fully Developed Laminar Heat Transfer in Triangular Passages E81-005

Plasmadynamics and MHD

Open-Cycle MHD Generator Channel Development E81-035
Wall Leakage Effect on Nonuniformities in Diagonal MHD Channels E81-032

Radiatively Coupled Flows and Heat Transfer

Heat Transfer Scaling Laws for MHD Channels and Diffusers E81-065
Convective and Radiative Heat Transfer in MHD Radiant Boilers E81-064
Heat and Mass Transfer in MHD Channels E81-006

Subsonic Flow

Feasibility Studies of Spoiler and Aileron Control Systems for Large Horizontal-Axis Wind Turbines E81-059
Experiments on a Hurricane Windmill Model E81-052

Interdisciplinary Topics

Analytical and Numerical Methods

Wind-Energy Conversion System Simulation Program E81-015

Atmospheric and Space Sciences

Wind Characteristics Over Complex Terrain Relative to WECS Siting E81-056

Lasers and Laser Applications

Model for Thermal Distortions of High-Energy Repetitively Pulsed Laser Mirrors E81-070

Marine Technology

Hydrodynamics, Vessel and Control Surface

Design of the OTEC Cold Water Pipe Against Problems Due to Vortex Shedding E81-003

Propulsion

Airbreathing Propulsion

Opptimization of Gas Turbine Combustor Stoichiometry for Expanded Operating Regime E81-061
Catalytic Honeycomb Combustor: Steady-State Model and Comparison with Experiment E81-043

Combustion and Combustor Designs

Opptimization of Gas Turbine Combustor Stoichiometry for Expanded Operating Regime E81-061
Catalytic Honeycomb Combustor: Steady-State Model and Comparison with Experiment E81-043
Pulsed Spray Drop Sizing E81-011
Stabilization of Low Calorific Value Gases in a Cyclone Combustor E81-009

Engine Performance

Pulsed Spray Drop Sizing E81-011

Spacecraft Technology

Electric Power

Radiatively Coupled Thermionic Power System Concept E81-012

Temperature Control

Liquid Droplet Radiators for Heat Rejection in Space E81-076

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators E81-021

Structural Composite Materials

UTRC 8-kW Wind-Turbine Tests E81-025

Structural Design

Wind Turbines for Irrigation Pumping E81-022
Wind-Loading Definition for the Structural Design of Wind-Turbine Generators E81-019

Structural Durability (including Fatigue and Fracture)

Experiments on a Hurricane Windmill Model E81-052

Structural Dynamics

Wind-Loading Definition for the Structural Design of Wind-Turbine Generators E81-019

Thermal Stresses

Model for Thermal Distortions of High-Energy Repetitively Pulsed Laser Mirrors E81-070

Thermophysics and Thermochemistry

Experimental Methods of Diagnostics

Electron and Positive Ion Measurements in MHD Combustion Plasmas with Phosphorous Additions E81-007

Radiation and Radiative Heat Transfer

Liquid Droplet Radiators for Heat Rejection in Space E81-076
Solar Drying of Coal Wastes from Slurry Ponds E81-051

Thermal Control

Calculated Characteristics of a Hydraulic Refrigeration System E81-067

Thermal Modeling and Analysis

Test Results for the APL/JHU Folded-Tube Aluminum Condenser E81-077
Falling-Bead Dry Cooling Tower E81-066
Thermodynamic Analysis of a Metal-Hydride Heat Pipe E81-049
Development of Steam Generator Components for Open-Cycle MHD E81-044
Fully Developed Laminar Heat Transfer in Triangular Passages E81-005

Thermal Pollution

Falling-Bead Dry Cooling Tower E81-066

Thermal Surface Properties

Influence of Contaminated Fuel on Turbine Vane Surface Deposition E81-063

Thermochemistry and Chemical Kinetics

Peat Char Gasification—Laboratory and PDU-Scale Studies E81-058
Use of Organic Working Fluids in Rankine Engines E81-046
Development of Steam Generator Components for Open-Cycle MHD E81-044
Electron and Positive Ion Measurements in MHD Combustion Plasmas with Phosphorous Additions E81-007

Thermophysical Properties of Matter

Use of Organic Working Fluids in Rankine Engines E81-046

Chronological Index

E79-001 Transient Heat Conduction From Buried Underground Radioactive Waste. P.B. Wells and E.A. Bathe, *Karman Sciences Corporation* (JE 3, 4, p. 227) Article
Technical Comment by R.L. Mussulman, *Montana State University* (JE 5, 1, p. 61)
Reply (JE 5, 1, p. 63)
Errata (JE 5, 3, p. 192)

E81-001 Viscous and Thermal Wakes in MHD Generators. Steven J. Schneider and Jean F. Louis, *Massachusetts Institute of Technology* (JE 5, 1, p. 3) Synoptic

E81-002 Wetting Layer and Void Fraction Nonuniformity in a Liquid-Metal MHD Generator. Herman Branover and Alexander Yakhot, *Ben-Gurion University of the Negev* (JE 5, 1, p. 5) Synoptic

E81-003 Design of the OTEC Cold Water Pipe Against Problems Due to Vortex Shedding. Owen H. Griffin, *Naval Research Laboratory* (JE 5, 1, p. 7) Synoptic
Errata (JE 5, 3, p. 192)

E81-004 Dependence of Efficiency of Shallow Junction Silicon Solar Cells on Substrate Doping. E. S. Rittner, A. Meulenberg and J. F. Allison, *COMSAT Laboratories* (JE 5, 1, p. 9) Article

E81-005 Fully Developed Laminar Heat Transfer in Triangular Passages. G. E. Schneider and B. L. LeDain, *University of Waterloo* (JE 5, 1, p. 15) Article based on AIAA Paper 79-0974

E81-006 Heat and Mass Transfer in MHD Channels. Kwan H. Im and R. K. Ahluwalia, *Argonne National Laboratory* (JE 5, 1, p. 22) Article based on AIAA Paper 80-0250

E81-007 Electron and Positive Ion Measurements in MHD Combustion Plasmas with Phosphorous Additions. K. D. Annen, P. J. Kuzmenko, R. Keating and S. A. Self, *Stanford University* (JE 5, 1, p. 31) Article

E81-008 Aerodynamic Performance of the DOE/Sandia 17-m-Diameter Vertical-Axis Wind Turbine. Mark H. Worstell, *Sandia National Laboratories* (JE 5, 1, p. 39) Article based on AIAA Paper 80-0655 CP803

E81-009 Stabilization of Low Calorific Value Gases in a Cyclone Combustor. S. E. Najim, A. C. Styles and N. Syred, *University College, U. K.* (JE 5, 1, p. 43) Article based on AIAA Paper 80-0075

E81-010 Solar Central Receiver Hybrid---A Cost Effective Future Power Alternative. D. G. Beshore, C. N. Bolton and J. E. Montague, *Martin Marietta Aerospace* (JE 5, 1, p. 51) Article based on AIAA Paper 80-0841

E81-011 Pulsed Spray Drop Sizing. J. E. Peters and A. M. Mellor, *Purdue University* (JE 5, 1, p. 57) Article

E81-012 Radiatively Coupled Thermionic Power System Concept. Katsunori Shimada, *California Institute of Technology* (JE 5, 1, p. 60) Technical Note

E81-015 Wind-Energy Conversion System Simulation Program. R. J. Assarabowski, *United Technologies Research Center*; and J. J. Mankauskas, *Norden Systems, United Technologies* (JE 5, 2, p. 66) Article based on AIAA Paper 80-0609 CP803

E81-016 Economics of Selected WECS Dispersed Applications. Stella Krawiec, *Solar Energy Research Institute* (JE 5, 2, p. 72) Article based on AIAA Paper 80-0618 CP803

E81-017 Offshore Wind-Energy-Conversion Systems. L. A. Kilar and P. H. Stiller, *Westinghouse Electric Corporation*; and D. F. Ancona, *U. S. Department of Energy* (JE 5, 2, p. 79) Article based on AIAA Paper 80-0619 CP803

E81-018 Aerodynamic Interference Between Two Darrieus Wind Turbines. P. R. Schatzle, P. C. Klimas and H. R. Spahr, *Sandia National Laboratories* (JE 5, 2, p. 84) Article based on AIAA Paper 80-0606 CP803

E81-019 Wind-Loading Definition for the Structural Design of Wind-Turbine Generators. A. Kareem, *University of Houston*; P. B. S. Lissaman and T. G. Zambrano, *AeroVironment Inc.* (JE 5, 2, p. 89) Article based on AIAA Paper 80-0610 CP803

E81-020 Preliminary Work Concerning the Near-Wake Structure of the Darrieus Turbine. James H. Strickland and Allen L. Goldman, *Texas Tech University* (JE 5, 2, p. 94) Article based on AIAA Paper 80-0627 CP803

E81-021 Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators. F. S. Stoddard, *Consultant* (JE 5, 2, p. 99) Article based on AIAA Paper 80-0611 CP803

E81-022 Wind Turbines for Irrigation Pumping. R. Nolan Clark, *Conservation and Production Research Laboratory;* Vaughn Nelson, Robert E. Barieau and Earl Gilmore, *West Texas State University* (JE 5, 2, p. 104) Article based on AIAA Paper 80-0639 CP803

E81-023 The Wingmill: An Oscillating-Wing Windmill. William McKinney and James DeLaurier, *University of Toronto* (JE 5, 2, p. 109) Article based on AIAA Paper 80-0621 CP803

E81-024 Experiments on an Oscillating Aerofoil and Applications to Wind-Energy Converters. K. H. Ly and V. A. L. Chasteau, *The University of Auckland (New Zealand)* (JE 5, 2, p. 116) Article based on AIAA Paper 80-0624 CP803

E81-025 UTRC 8-kW Wind-Turbine Tests. M. C. Cheney, *United Technologies Research Center* (JE 5, 2, p. 122) Article based on AIAA Paper 80-0657 CP803

E81-026 Experimental Studies of Solar and Solar-Dehumidification Lumber Drying. P.Y.S. Chen and H.N. Rosen, *North Central Forest Experiment Station;* W.A. Helmer, *Southern Illinois University* (JE 5, 3, p. 130) Synoptic based on AIAA Paper 80-9466

E81-027 Solar Power Satellites---Heat Engine or Solar Cells? Henry Oman and Daniel L. Gregory, *Boeing Aerospace Company* (JE 5, 3, p. 132) Article based on AIAA Paper 78-1684

E81-028 Low Maintenance Lead-Acid Batteries for Energy Storage. B.W. Burrows and W.G. Sunu, *Gould Laboratories,* and B.H. Dick, *Gould, Inc.* (JE 5, 3, p. 138) Article based on AIAA Paper 80-9236

E81-029 Rankine Cycle Augmented Light-Gas-Flow Turbine Studies. J. E. Minardi, M. O. Lawson, I. O. Salyer, H. P. von Ohain, R. K. Newman and L. I. Boehman, *University of Dayton Research Institute and Mechanical Engineering* (JE 5, 3, p. 142) Article based on AIAA Paper 80-9197

E81-030 Wind Shear and Gustiness at the Mod-1 Site, Boone, North Carolina. Michael Garstang, J. W. Snow and George D. Emmitt, *University of Virginia* (JE 5, 3, p. 146) Article based on AIAA Paper 80-0648 CP803

E81-031 Experimental and Theoretical Studies of Nitrogen Oxide Production in a Turbient Premixed Flame. Pierre Moreau and Roland Borghi, *Office National d'Etudes et de Recherches Aerospatiales (ONERA)* (JE 5, 3, p. 152) Article based on AIAA Paper 80-0078

E81-032 Wall Leakage Effect on Nonuniformities in Diagonal MHD Channels. S. Kuo, E. Levi and B. Cheo, *Polytechnic Institute of New York* (JE 5, 3, p. 158) Article

E81-033 Feasibility Study of Wind-Powered Systems for Dairy Farms. Jon G. McGowan, *University of Massachusetts*; and Paul F. Wendelgass, *New York State Energy Office* (JE 5, 3, p. 164) Article based on AIAA Paper 80-0641 CP803

E81-034 Multispeed Electrical Generator Application to Wind Turbines. Theodore S. Anderson and Herbert S. Kirschbaum, *Westinghouse Electric Corporation* (JE 5, 3, p. 172) Article based on AIAA Paper 80-0635 CP803

E81-035 Open-Cycle MHD Generator Channel Development. R. Kessler, *Avco Everett Research Laboratory, Inc.* (JE 5, 3, p. 178) Article based on AIAA Paper 80-9037

E81-036 Seasonal Variations of Atmospheric Clearness Numbers for Use in Solar Radiation Modelling. D. Y. Goswami, D. E. Kiett, E. K. Stefanakos and T. K. Goswami, *North Carolina A&T State University* (JE 5, 3, p. 185) Technical Note based on AIAA Paper 80-0396

E81-037 Thermionic Emission and Surface Composition of the Y-B System. James Jaskie and Dean Jacobson, *Arizona State University* (JE 5, 3, p. 187) Technical Note based on AIAA Paper 80-9469

E81-038 Aerodynamic Performance of Vertical and Horizontal Axis Wind Turbines. Randall C. Maydew and Paul C. Klimas, *Sandia National Laboratories* (JE 5, 3, p. 189) Technical Note

E81-039 Autonomous Solar Thermo Pump for Lift Irrigation. Thuraisingam Vinayagalingam, *University of the West Indies* (JE 5, 3, p. 191) Technical Note

E81-042 Behavior of OH and NO_x in a Mixing-Influenced Jet-Stirred Reactor. Philip C. Malte, *University of Washington;* Stephen C. Schmidt, *Los Alamos Scientific Laboratories;* John C. Kramlich, Kenneth D. Spitzer, Dan Yee and Surendra Singh, *Washington State University* (JE 5, 4, p. 193) Article based on AIAA Paper 80-0209

E81-043 Catalytic Honeycomb Combustor: Steady-State Model and Comparison with Experiment. James S. T'ien, *Case Western Reserve University* (JE 5, 4, p. 201) Article based on AIAA Paper 80-1289

E81-044 Development of Steam Generator Components for Open-Cycle MHD. Terry R. Johnson, Gregory F. Berry and Michael Petrick, *Argonne National Laboratory* (JE 5, 4, p. 208) Article based on AIAA Paper 80-9038

E81-045 Sensitivity Analysis of a Solar-Driven Chemical Heat Pump System. W. R. L. Thomas, *Exxon Research and Engineering Company* (JE 5, 4, p. 214) Article based on AIAA Paper 80-9181

E81-046 Use of Organic Working Fluids in Rankine Engines. H. M. Curran, *Hittman Associates, Inc.* (JE 5, 4, p. 218) Article based on AIAA Paper 80-9194

E81-047 Design of 40-MW Grazing and Moored OTEC Pilot/Demonstration Plants. Dennis Richards and James F. George, *Applied Physics Laboratory, The Johns Hopkins University*; and Jerry S. Seward, *Seward Associates* (JE 5, 4, p. 224) Article based on AIAA Paper 80-9262

E81-048 Projected Costs for Electricity and Products from OTEC Facilities and Plantships. G. L. Dugger, R. W. Henderson, E. J. Francis and W. H. Avery, *Applied Physics Laboratory, The Johns Hopkins University* (JE 5, 4, p. 231) Article based on AIAA Paper 80-9263

E81-049 Thermodynamic Analysis of a Metal-Hydride Heat Pipe. H. I. Abelson, *Argonne National Laboratory*; and J. S. Horowitz, *U. S. Department of Energy* (JE 5, 4, p. 237) Article based on AIAA Paper 80-9427

E81-050 Eastern In Situ Coal Gasification Field Trial. Leo A. Schrider, *Morgantown Energy Technology Center*; and James A. Wasson, *West Virginia University* (JE 5, 4, p. 244) Article based on AIAA Paper 80-9255

E81-051 Solar Drying of Coal Wastes from Slurry Ponds. Wayne A. Helmer and Ahmed Abbass, *Southern Illinois University* (JE 5, 4, p. 249) Technical Note based on AIAA Paper 80-9465

E81-052 Experiments on a Hurricane Windmill Model. Victor W. Bolie, *University of New Mexico* (JE 5, 4, p. 250) Technical Note

E81-053 Tandem-Disk Theory---With Particular Reference to Vertical Axis Wind Turbines. J. V. Healey, *The Queen's University of Belfast* (JE 5, 4, p. 251) Technical Note

E81-054 Comparison of Field and Wind-Tunnel Darrieus Wind-Turbine Data. Robert E. Sheldahl, *Sandia National Laboratories* (JE 5, 4, p. 254) Technical Note

E81-055 Teetered, Tip-Controlled 100-kW Wind-Turbine Rotor: Preliminary Test Results. J. C. Glasgow and D. R. Miller, *NASA Lewis Research Center* (JE 5, 5, p. 257) Article based on AIAA Paper 80-0642 CP803

E81-056 Wind Characteristics Over Complex Terrain Relative to WECS Siting. Walter Frost and Chih Fang Shieh, *FWG Associates, Inc.* (JE 5, 5, p. 263) Article based on AIAA Paper 80-0645 CP803

E81-057 Predicted Performance of Geopressured Geothermal Energy Conversion Systems Using Thermodynamic Availability Concepts. J. P. Lamb, G. F. Polansky and S. P. Bradley, *The University of Texas at Austin* (JE 5, 5, p. 270) Article based on AIAA Paper 80-9160

E81-058 Peat Char Gasification—Laboratory and PDU-Scale Studies. D.V. Punwani, S.A. Weil, E.J. Pyrcioch and S.P. Nandi, *Institute of Gas Technology* (JE 5, 5, p. 276) Article based on AIAA Paper 80-9189

E81-059 Feasibility Studies of Spoiler and Aileron Control Systems for Large Horizontal-Axis Wind Turbines. W. H. Wentz Jr. and M. H. Snyder, *Wichita State University*; and John T. Calhoun, *Consulting Engineer, Renton, Washington* (JE 5, 5, p. 281) Article based on AIAA Paper 80-9226

E81-060 Catalytic Combustion of Hydrogen in Model Appliances. Jon B. Pangborn, *Institute of Gas Technology* (JE 5, 5, p. 285) Article based on AIAA Paper 80-9344

E81-061 Optimization of Gas Turbine Combustor Stoichiometry for Expanded Operating Regime. William J. Egan Jr. and Richard S. Reilly, *Pratt & Whitney Aircraft;* and Kenneth N. Hopkins, *AFWAL/POTC, Wright Patterson Air Force Base* (JE 5, 5, p.289) Article based on AIAA Paper 80-1286

E81-062 Gas Distribution Equipment in Hydrogen Service—Phase II. Walter J. Jasionowski and H. Ding Huang, *Institute of Gas Technology* (JE 5, 5, p. 298) Article based on AIAA Paper 80-9460

E81-063 Influence of Contaminated Fuel on Turbine Vane Surface Deposition. D. A. Nealy and W. H. Timmerman, *General Motors Corporation*; and A. Cohn, *Electric Power Research Institute* (JE 5, 5, p. 302) Article based on AIAA Paper 80-1113

E81-064 Convective and Radiative Heat Transfer in MHD Radiant Boilers. Kwan H. Im and R.K. Ahluwalia, *Argonne National Laboratory* (JE 5, 5, p. 308) Article

E81-065 Heat Transfer Scaling Laws for MHD Channels and Diffusers. R. K. Ahluwalia and K. H. Im, *Argonne National Laboratory* (JE 5, 5, p. 315) Article

E81-066 Falling-Bead Dry Cooling Tower. R. Decher, *University of Washington* (JE 5, 6, p. 321) Synoptic based on AIAA Paper 80-9476

E81-067 Calculated Characteristics of a Hydraulic Refrigeration System. Warren Rice, *Arizona State University* (JE 5, 6, p. 323) Article

E81-068 Thermal Performance of a Solar Still. M. S. Sodha, J. K. Nayak, Usha Singh and G. N. Tiwari, *Indian Institute of Technology* (JE 5, 6, p. 331) Article

E81-069 Tension-Field Wind Machine for Substantial Energy Production. David Z. Bailey, *Bailey Engineering*; and Richard B. Noll, *Aerospace Systems, Inc.* (JE 5, 6, p. 337) Article based on AIAA Paper 80-0622 CP803

E81-070 Model for Thermal Distortions of High-Energy Repetitively Pulsed Laser Mirrors. George W. Sutton, *Avco Everett Research Laboratory, Inc.* (JE 5, 6, p. 344) Article

E81-071 Retorting and Combustion Processes in Surface Oil-Shale Retorts. A. E. Lewis and R. L. Braun, *Lawrence Livermore National Laboratory* (JE 5, 6, p. 355) Article based on AIAA Paper 80-9058

E81-072 Pneumatic Energy Transmittal in Wind-Power Systems. J. A. C. Kentfield, *The University of Calgary* (JE 5, 6, p. 362) Article based on AIAA Paper 80-9164

E81-073 Temperature Limitations of Alkaline Battery Electrodes. Michael C. H. McKubre, *SRI International*; and Digby D. Macdonald, *Ohio State University* (JE 5, 6, p. 368) Article based on AIAA Paper 80-9240

E81-074 Combined Fracture/Porous Media Model for Contaminant Transport. H. E. Nuttall and A. K. Ray, *The University of New Mexico* (JE 5, 6, p. 376) Article based on AIAA Paper 80-9259

E81-075 Thermal Buffering of Receivers for Parabolic Dish Solar Thermal Power Plants. R. Manvi, T. Fujita, B.C. Gajanana and C.J. Marcus, *Jet Propulsion Laboratory, California Institute of Technology* (JE 5, 6, p. 381) Article based on AIAA Paper 80-9348

E81-076 Liquid Droplet Radiators for Heat Rejection in Space. A. T. Mattick and A. Hertzberg, *University of Washington* (JE 5, 6, p. 387) Article based on AIAA Paper 80-9477

E81-077 Test Results for the APL/JHU Folded-Tube Aluminum Condenser. Peter P. Pandolfini, Gordon L. Dugger and John A. Funk, *Applied Physics Laboratory, The Johns Hopkins University* (JE 5, 6, p. 394) Article

E81-078 Optimization of Liquid Desiccant Systems for Solar/Geothermal Dehumidification and Cooling. C. S. Patrick Peng and John R. Howell, *The University of Texas at Austin* (JE 5, 6, p. 401) Article based on AIAA Paper 80-1546
